Live Well A.P.S., Inc. — Who We Are

We subscribe to the motto — In an environment of government “incentivized” regulations, superior business intelligence is the ONLY way to triumph.

We are a contracted agency and facilitator for leading experts that specialize in the processes and implementation of optimization solutions for financial ROI.

Together we support thousands of independent and hospital-based physicians & clinicians, multi-TIN, Medicare Advantage plan providers, and ACO and Advanced APM members. We deliver **Maximum Value** with vital CMS program guidance and the most effective and innovative clinical and non-clinical business solutions that improve compliance, reimbursement, and efficiency. In addition, streamline costs and reduce hassles.

Most Medicare Providers are Failing to Meet All CMS Compliance Requirements and Maximize Revenue Opportunities

CMS rule changes have created many challenges and opportunities for TINs and their providers.

The high cost of doing business has not been met with adequate increases in reimbursement by CMS and MA plans. And the increasing administrative burdens due to inappropriate MA plan practices have created an environment of financial uncertainty. This means TINs are running ever faster (and never catching up) needing to file more claims to offset decreasing reimbursement.

The solution, the **Provider Tune Up** platform can help your TIN increase revenue / pmpm without seeing more patients while maintaining your independence and/or control of the way you practice.

The platform offers a comprehensive suite of services:

- Medicare CCM Program Optimization
- MACRA Optimization
- HIE Optimization
- RAF Compliance Optimization
- Patient Outreach Optimization

(See our website for the important details on each)

Though most TINs did a good job meeting compliance in the past, due to complexity and the failure of vendors and health plans to provide TINs and their providers with the proper expertise, tools, and/or training, 98% are **NOT** meeting requirement benchmarks and targets on at least one, but for some, all five categories.

THE PROVIDER TUNE UP IS SMART, SAFE & VITAL

- INCREASE REIMBURSEMENT.
- INCREASE BILLING ENCOUNTERS.
- BRIDGE COMPLIANCE GAPS.
- IDENTIFY/ADDRESS/REDUCE GAPS-IN-CARE.
- IMPROVE PATIENT RAF SCORES.
- INCREASE SHARED SAVINGS.
- IMPROVE MIPS SCORE.
- MAXIMIZE PAYMENT ADJUSTMENT UNDER THE QPP & MACRA.
- IMPROVE PATIENT SATISFACTION.
- REDUCE OPERATING COSTS.
- LIMITED WORKLOAD.
- NO STAFFING REQUIREMENTS.
- AND MORE.

Administrators even boast about their cost of care, Quality scores, robust risk adjustment, abstract coding teams, QA audit teams, care coordination, and provider education. Unfortunately, they are still apathetic about action needed because up until now, fully meeting requirements has not amounted to any significant increase in revenue. This has now changed.

So, now when ownership, boards, and/or stakeholders ask why your TIN's reimbursement has been reduced or why you failed to maximize reimbursement with the Medicare CCM Program, and/or the payment adjustment under the QPP & MACRA, and no one can explain why or do anything about it, ignorance or apathy will not be an accepted excuse. **Don't let this happen to you!**

The Support You Need

All services are offered on a Clinic-by-Clinic basis and tailored to your clinic's specific needs, which can change from one year to the next. They require very little workload and no additional staffing requirements.

We make the decision on whether to invest in optimization services or stay the course with your ACO, vendor(s), or your own efforts, very easy.

Data Analysis

Unlocking Financial Rewards starts with a **Medicare CCM Program** and **RAF Verification**, and maximizing your payment adjustment under the QPP begins with a **MIPS Category Weights Data Analysis**.

To determine the best course of action, we must first find out exactly where you are hitting and where you are missing. We will utilize publicly available CMS data, and data you supply us from your QPP Detailed Final Report, ACO, MA Plan(s), Electronic Medical Records (EHR) system, Practice Management System, and/or other manual sources.

You should expect to spend an hour or two working with our teams to extract the data points required. The research, analysis, and report efforts will take several manhours to complete on each analysis. Within two business days, we will be ready to discuss the finding and recommendations with you via Zoom calls (One for MIPS and one for RAF) and present the Optimization Strategy Reports. These reports will identify any compliance gaps & vulnerabilities and provide the most effective recommendations and solutions.

The Bottom Line

The **Provider Tune Up** platform is the empowering solution that will ensure your TIN meets all requirements, improves Quality Scores, patient outcomes, provider utilization, the ability to act upon information immediately, and create accurate documentation that supports a patient's diagnosis and satisfies potential Quality Care and CMS / MA audits.

In addition, increase billing encounters, reimbursement, and shared savings distributions, reduce cost of care, and unlock Medicare CCM Program revenue streams. A reasonable analysis and / or set-up fee applies.
